Pune, India

- **Delivered 250+ projects** including Salesforce implementations, client onboarding, upgrades, consulting engagements, and AI voice and chat bot builds, with about 85% completed on schedule.
- Gathered and translated business requirements into scalable Salesforce solutions built with Flows, Triggers, Apex, and injection points, using this stack on nearly every implementation.
- **Built 10+ reusable templates** for recurring client use cases, standardizing delivery and cutting per-project build effort.
- Built and deployed AI voice and chat bots; implemented Agentforce with Omni-Channel for Service Cloud.
- **Managed administration for 75+ client organizations,** covering user provisioning, permissions and security, and sandbox/environment configuration.
- **Earned 20+ CSATs and AppExchange recommendations** through consistent, high-quality delivery and strong client relationships.
- **Resolved dev-level and implementation issues on ~50 support tickets,** acting as technical escalation support for the support team.
- **Mentored and trained 10 new hires,** including interns and junior consultants, and participated in recruitment evaluations.
- Ran client training and knowledge sessions and produced training materials and custom documentation to drive product adoption and client self-sufficiency.

AI-ENABLED DELIVERY

- Built a custom GPT and used ChatGPT to generate and refine prompts for client AI bots.
- Used Claude to draft project plans, solution designs, and technical documentation, cutting documentation time.
- Used Claude Code to automate recurring daily tasks and improve personal productivity.
- Created training materials and custom requirement documents with AI assistance, then reviewed and validated them for accuracy.
